RemiMount-S

This is our signature product. It is a double-sided, self-wound pressure-sensitive permanent high tack mounting adhesive with one silicone release liner. RemiMount S is an all-purpose cold mounting adhesive formulated to give excellent hold-down strength on substrates such as foam or gatorboard and art board. Ideal for permanent mounting of electrostatic, digital prints, ink jet and photographic materials. High Initial tack. Ideal for pre-coating foam/paper substrates. Ideally used in conjunction with a pressure sensitive or thermal laminate to create high quality wide format graphics. May be used indoor or for short term outdoor applications. This self wound mounting adhesive is manufactured with a double sided siliconized, moisture stable release paper. A wide variety of sizes are available. All products are wound on 3" diameter cores unless otherwise specified.

Mounting Film

RemiMount-TM

A (Heat Activated) self-wound mounting adhesive with a "tacky" surface and one silicone release liner. RemiMount TM is a general use hot mounting adhesive formulated to give excellent hold-down strength on substrates such as foam or gatorboard and art board. With the prepared "tacky" surface, the accurate re-positioning of graphics can be achieved while permanently mounting ink jet, electrostatic and photographic materials. When pre-coated to a substrate, one-pass mounting and laminating can be achieved. This product may also be used in the "decal" method and applied to the back of your printed media at the same time it is being laminated with a thermal laminate. Ideal for pre-coating MOST substrates
