Sihl 11 mil Barite Photo Paper semi glossy 290 g/m² is a single side coated high end photo paper for inkjet with dye and pigmented inks. It is especially designed to replicate classic silver halide barite photo reproductions. The unique Sihl inkjet coating contains real barite, so the paper can be considered as real barite paper. The coating delivers high optical densities, superior tonal range for skin tone rendering and global image atmosphere associated with classic barite applications. The Sihl Barite Photo Paper is optimized for both, black and white as well as color prints. Our Barite Photo Paper is pH-buffered for high image permanence and long term archive ability. Dye & UV Inks

Fabric Transfer

4583

Sihl T-Printz Universal Light Fabric Transfer – 3.5 mil (transfer only) plus 4.0 mil Release Liner is a fabric transfer media specifically designed to create brilliant colorful images on white or light colored fabrics using either aqueous or solvent ink jet print technology. This new product is designed so the ink and media penetrate the fabric leaving a smooth “soft-hand”. The fabric transfer is carried on a special kraft release liner, so no transfer paper is needed. 4583 can be contour cut with a print/cut device or with a standard vinyl cutter.
