# Canvas

3482

**Sihl SMART Canvas 24 mil 435 g/m<sup>2</sup> Matte surface for Solvent is our good value alternative to the high-end 3609 Picasso Canvas. It is also the right choice per definition for applications where a matte finish is preferred. The matte surface is well suitable for high-quality printing with eco and true-solvent inks. The 2:1 and 100% natural cotton structure gives the product it's natural and professional look, but doesn't disturb the printed image. Also with higher amounts of ink, uniform area prints with high contrast are possible. The printed surface is splash-water-proofed and suitable for long-lasting art-reproductions.**

	<u>Roll Size</u>	<u>Price / Roll</u>	<u>Price / Sq.ft.</u>
	30 " x 50 ft.	\$95.59	\$0.76
	54 " x 50 ft.	\$172.06	\$0.76
	60 " x 50 ft.	\$191.18	\$0.76

3609

**Sihl Picasso - 17 mil Canvas is a single side Artistic Canvas (polyblend fabric) satin finish coating, water resistant for indoor and outdoor banners.**

# Fabric

## Bermuda

**Mediatex Bermuda** From the fiber to the construction of the woven fabric the high technical article BERMUDA has been developed for high mechanical strain. BERMUDA is resistant to all tensile stress which may occur in different applications and prevents quick tearing or tear propagation during handling. BERMUDA is one-sided coated with a special polymer which allows in combination with solvent ink a highly brilliant print at lowest ink wastage. BERMUDA is tested with the following solvent printers: AGFA • Mimaki • Mutoh • Roland • Vutek • Scitex • Seiko • HP 9000 • Nur • OCÉ • etc.

**Raw Material:** 100 % PES (Polyester)

**Type of Production:** woven

**Weight in g/m<sup>2</sup>:** 310 +/- 15

**Suitable Inks:** all solvent, eco-solvent and uv-curable inks

**Suitable Printer:** all common models

**Coating:** triple polymer coating

**Recommended Areas of Application:** indoor & outdoor, textile architecture, marquees, roller blinds, promotional tents, sun shading, umbrellas as well as most common graphical applications

**Special features:** highest print brilliance and acutance, low ink consumption, highly tear proof, certified flame retardant, no white creasing, dirt repellent, waterproof, water resistant, can be cut hot or cold, no curling

<u>Roll Size</u>		<u>Price Per Roll</u>
43.34 "	x 98.42 ft	\$568.22
53.98 "	x 98.42 ft	\$671.58
63.83 "	x 98.42 ft	\$1,036.40
98.50 "	x 98.42 ft	\$2,040.16
121.40 "	x 164.04 ft	\$2,040.16

## Aqua

**Mediatex AQUA** is one-sided coated with an special polymer with high whiteness, which allows in combination with solvent ink a highly brilliant print at lowest ink wastage. AQUA is absolute water resistant and almost air impermeable. These features lead AQUA to a perfect print media for light covering, for advertising umbrellas and for outdoor backlit displays. AQUA is tested with the following solvent printers: AGFA • Mimaki • Mutoh • Roland • Vutek • Scitex • Seiko • Nur • OCÉ • etc. (not for Seiko Colorpainter 64S and HP 9000)

**Raw Material:** 100 % PES (Polyester)

**Type of Production:** woven

**Weight:** in g/m<sup>2</sup> 110 +/- 10

**Suitable Inks:** all solvent, eco-solvent and uv-curable inks

**Suitable Printers:** all common models except Seiko, HP and Mutoh

**Coating:** triple polymer coating

**Recommended Areas of Application:** indoor & outdoor, backlit displays, inner tent decorations, light advertising banner, advertising umbrellas

**Special Features:** highest print brilliance and acutance, low ink consumption, certified flame retardant, good opacity, high degree of whiteness, stain resistant, water resistant, airtight, can be cut hot or cold, excellence light transmission

<u>Roll Size</u>		<u>Price Per Roll</u>
39.04 "	x 82.02 ft	\$224.76
53.98 "	x 82.02 ft	\$350.20
63.83 "	x 82.02 ft	\$375.67
78.08 "	x 82.02 ft	\$391.69

# Fabric

## Presto

Mediatex PRESTO is one-sided coated with an special polymer with high whiteness, which allows in combination with solvent ink a highly brilliant print at lowest ink wastage. Crinkles, which you can get at the handling, wear off caused by the polymer coating. PRESTO is absolutely water resistant and almost air impermeable. These features lead PRESTO to a perfect print media for light covering in fair constructions, for display and outdoor backlits. PRESTO is tested with the following solvent printers: AGFA • Mimaki • Mutoh • Roland • Vutek • Scitex • Seiko • Nur • Océ • etc. (not for Seiko Colorpainter 64S and HP 9000)

**Raw Material:** 100 % PES (Polyester)

**Type of Production:** woven

**Weight: in g/m<sup>2</sup>:** 200 +/- 10

**Suitable Inks:** all solvent, eco-solvent und uv-curable inks

**Suitable Printers:** all common models except HP, Seiko and Mutoh

**Coating:** triple polymer coating

**Recommended Areas of Application:** indoor & outdoor, exhibition stands, promotional umbrellas, promotional tents, short-term outdoor advertising, displays, backlit outdoors, inflatable

**Special Features:** highest print brilliance and acutance, low ink consumption, certified flame retardant, high degree of whiteness, waterproof, air impermeable, soft haptics, high flexibility, can be cut hot or cold

<u>Roll Size</u>		<u>Price Per Roll</u>
43.34 "	x 98.42 ft	\$395.33
53.98 "	x 98.42 ft	\$492.18

98.50 "	x 98.42 ft	\$897.64
121.40 "	x 164.04 ft	\$1,645.18

## J & M Air

Mediatex JM-AIR is one-sided coated with a special polymer with high whiteness. Caused by the polymer coating you get in combination with solvent ink a highly brilliant print at lowest ink wastage. JM-AIR is characterized by a high flexibility and therefore specially qualified for textile architecture (covering) and large format printing. JM-AIR is tested with the following solvent printers: AGFA • Mimaki • Mutoh • Roland • Vutek • Scitex • Seiko • HP 9000 • Nur • Océ • etc.

**Raw Material:** 100 % PES (Polyester Canvas Texture)

**Type of Production:** woven

**Weight in g/m<sup>2</sup>:** 230 +/- 15

**Suitable Inks:** all solvent, eco-solvent und uv-curable inks

**Suitable Printers:** all common models

**Coating:** triple polymer coating

**Recommended Areas of Application:** indoor & outdoor, textile architecture, large format printing, anchoring as well as traditional graphical applications

**Special Features:** highest print brilliance and acutance, low ink consumption, certified flame retardant, waterproof, water resistant, high flexibility, can be cut hot or cold

<u>Roll Size</u>		<u>Price Per Roll</u>
39.40 "	x 98.42 ft	\$289.38

60 "	x 100 ft.	\$367.65	\$0.74

# Fabric

## Light Box

Mediatex Light Box Material especially to meet the specific demands made on printed images used in backlit applications. This results in colors that shine very brightly. The key differentiator of this fabric is its special coating. However, the macro-porous coating of Mediatex Light box actually intensifies the brilliance of the colors. When light reaches the fabric it initially gets absorbed and then diffused through to the other side. This results in more brilliant colors while black remains truly black and does not turn grey. LIGHT BOX is tested with the following solvent printers: Mimaki • Roland • Vutek • Scitex Nur • Océ • etc. not for Seiko 64S and HP 9000)

# Wall Paper Media

## Arnette Emboss

Dreamscape 20 Oz (13 Oz per sq yd) This texture has thin vertical strands, similar to look in corduroy. Arnette is most commonly used to enhance a large print pattern or design by giving a natural fabric appearance. This Type II wallcovering grade material is a 2 ply product with a Arnette embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Onsaburg)

## Cabretta Emboss

Dreamscape 20 Oz (13 Oz per sq yd) This texture is a reproduction of fine cabretta leather. The creased surface gives a look similar to calfskin. Often used with colors, patterns or prints simulating leather. Great for accenting a leather look for a den or point of interest mural with a western touch. This Type II wallcovering grade material is a 2 ply product with a cabretta embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. # Wall Paper Media

## Canvas Emboss

Dreamscape 20 Oz (13 Oz per sq yd) The Canvas surface replicates the look of utilitarian canvas. The woven texture has a realistic fabric-like appearance that softens details and adds a rough threaded dimension to designs and graphics. Besides its most common use in wall murals, canvas has been used in fine art applications and is also a popular texture for indoor banners as the texture looks like a fabric. This Type II wallcovering grade material is a 2 ply product with a canvas embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. ## Artist Canvas

Dreamscape 20 Oz (13 Oz per sq yd) This texture is a reproduction of fine art canvas or painters canvas. This surface adds a great elegance to any wall. Artist Canvas from DreamScape is also commonly used for the Giclee and Fine Decor business in reproducing digitally printed works of art. This Type II wallcovering grade material is a 2 ply product with a Artist Canvas embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for wall murals looking to capture a painted look, special effect signs, and wallcoverings. This product can also be used as a Giclee or Fine Decor material. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Non-Woven)

## Luster Emboss

Dreamscape 20 Oz (13 Oz per sq yd) This is a smooth surface that has a semi-gloss finish for fine detail and strong color saturation. Excellent for photographic mural and rendered design applications. The glossy look of Luster will make your colors explode and pop. If you application calls for a smooth surface with less shine, we recommend Matte or Cashmere. This Type II wallcovering grade material is a 2 ply product with a luster embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Non-Woven)

## Mache Emboss

Dreamscape 20 Oz (13 Oz per sq yd) Mache is a crinkled finish that simulates the look of old parchment. Although strongly textured, this surface still provides good detail separation and color saturation. This Type II wallcovering grade material is a 2 ply product with a mache embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Osnaburg)

## Wall Paper Media

### **Matte Emboss**

Dreamscape 20 Oz (13 Oz per sq yd) Matte is a flat finish with a slight tooth suitable for photographic and detailed designs. The surface is smooth but not dull as a flat matte surface would be. Recommended for crisp, sharp edged designs with large color area. If you are looking for something that is less shiny but still smooth, we recommend Cashmere. A shiny alternative would be Luster. This Type I wallcovering grade material is a 2 ply product with a matte embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type I certification for scrubbability, tensile and tear ( light to medium duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Non-Woven

### **Mystical Emboss**

Dreamscape 20 Oz (13 Oz per sq yd) The Mystical texture is often described as a "light cobweb" and one that simulates the look of hand painted brush strokes. Popular to represent artwork. Mystical is a suitable option for almost any image because of its unique swirls and subtle effect. Mystical provides just enough texture to make your project stand out, without interfering with the printed design. This Type II wallcovering grade material is a 2 ply product with a mystical embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Osaburg)

## PebbleSand Emboss

Dreamscape 20 Oz (13 Oz per sq yd) PebbleSand is a deep, coarse texture with a bumpy ridged surface. The strong texture of PebbleSand is very noticeable and will attract certain attention to any project. The surface has a three dimensional effect to catch the light and make your image jump out. Because of the heavy texture, this surface lends itself more to design than detailed photographic reproduction. This Type II wallcovering grade material is a 2 ply product with a pebblesand embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing Osnaburg)

## Pique Emboss

Dreamscape 20 Oz (13 Oz per sq yd) The Pique embossing effect looks like pique textile fabric. It is popular for patterns and a wallpaper look. The dimensional nature of the grooved texture also reduces glare from light sources. This Type II wallcovering grade material is a 2 ply product with a pique embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing Non-Woven)

## Plaster Emboss

Dreamscape 20 Oz (13 Oz per sq yd) The Plaster embossing effect allows you to give the impression that your artwork was painted directly onto the textured drywall surface. Rough grooves mixed with raised flat spots create a pleasing random dispersion of hot spots. Very popular for wall murals in restaurants, bars, and stores. This Type II wallcovering grade material is a 2 ply product with a plaster embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Osnaburg)

## Pueblo Emboss

Dreamscape 20 Oz (13 Oz per sq yd) The Pueblo embossing is a light cracked plaster effect. This texture is popular for an "old world" or southwestern adobe wall look. Recommended for residential and commercial applications where custom theme artwork sets the tone. This Type II wallcovering grade material is a 2 ply product with a Pueblo embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Osnaburg)

# Wall Paper Media

## Sandblast Emboss

Dreamscape 20 Oz (13 Oz per sq yd) The Sand Blast embossing is a heavier stipple ( when compared to dreamscape Suede), with the look and feel of a medium to heavy sand paper. The random nature of the texture is suitable for just about any graphic project. This Type II wallcovering grade material is a 2 ply product with a SandBlast embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Osaburg)

## Suede Emboss

Dreamscape 20 Oz (13 Oz per sq yd) The Suede embossing effect is similar to suede fabric with its nap and texture. Suede has a light stipple surface that can be utilized for nearly any project. The light texture works well to reduce glare from direct light, while adding a warmth to the print. Suede is a very popular option for wall murals of all kinds because the random natural texture does not interfere with any print. This Type II wallcovering grade material is a 2 ply product with a suede embossing on the printable surface. Recommended for indoor use or short term outdoor, this product is ideal for murals, special effect signs, and wallcoverings. This product carries Type II certification for scrubbability, tensile and tear ( medium to heavy duty). This product is Class A fire rated and meets NFPA ratings for smoke development. (Backing - Osaburg)

## SpunSILK

Dreamscape 20 Oz (13 Oz per sq yd) Silk media is a specialty fine art vinyl product with a whisper thin fabric face which was designed to produce a unique density effect in continuous areas. When printed on a solvent based ink jet system, the surface yields a printed result that may best be described as dappled, with higher density areas affected to a greater level than lighter areas. SpunSilk produces a soft, shimmering fabric-like effect that will enhance a particular design or image. The modulating surface character creates subtle differences to each image printed adding a custom look to the printing. This unique surface actually contains a thin spun silk-like material to replicate the look of fine fabric. It is especially suited for creating custom wall covering patterns and textile look images. It is a medium that will stimulate the imagination and creative capabilities of designers and artists and provides the digital printing service with a unique product offering. **NOTE: SpunSilk is not recommended for photographic reproduction or precision color graphics, and may yield a veiled, uneven look where highly saturatec**

## WallWrap Monet (Peel & Stick)

DreamScape WallWrap Monet Artist CANVAS EMBOSS is a revolutionary wallcovering material with self adhesive backing. WallWrap is a thick 13 mil vinyl, weighing 15oz with a textured surface that has many advantages over other thin films. This product has superior durability and will not stretch during installation. The textured surface hides wall imperfections and also reduces surface glare from bright lights. WallWrap has an aggressive adhesive that is flame resistant, repositionable and intended for short to mid term usage. ( for permanent adhesion to wall surfaces please use our normal dreamscape products ). This product has been tested on painted or primed drywall, metal, glass, wood panelling, composite surfaces - and will work reliably on most smooth clean surfaces. Time and cost of installation for murals and wall graphics will be greatly reduced - removal is as simple as peeling off the wall with no messy residue.
