**dream it...print it ...hang it**

## **Liquid Laminate**

**In addition to protecting from everyday wear and contact, wall covering pretreated with DreamGuard Protex3 are more resistant to installation problems associated with marking, marring and staining of wall covering surfaces. Now with a choice of matte and satin finish, designers and architects can better control the desired sheen of their wall application. DreamGuard Protex3 never yellows or dulls, maintaining the fresh look for the life of the wall covering surface. DreamGuard is formulated with a non-hazardous water based formulation.**

**The new coating is superior to other liquid laminates because it gives users the option to apply the laminated to textured vinyl surfaces with a liquid a liquid laminator, brush or roller. The self leveling liquid laminated is uniquely designed to evenly cost textured vinyl wall covering or murals, sealing and protecting the entire surface area.**

**The revolutionary new topcoat material can be applied flat after printing or vertically at jobsite installations, allowing contractors to seam, seal and protect textured surfaces and other vinyl surfaces, wall coverings all in one step. They can also use Dream Guard Protex3 to retouch or coat already installed murals or wall coverings, giving them added UV stability, wash ability and durability.**
